

SUPREME COURT AT MACLEOD

The civil sittings of the supreme court for the judicial district of Macleod were opened Monday at 2 p.m. with His Lordship Justice McCarthy presiding. Two cases will be heard at this session, one of which is a jury case. The following were the cases on the docket: Simister vs. Connah, for recovery of \$752.75; L. H. Putnam for the plaintiff and R. Beverage for the defendant. Case stood over pending instructions.

Chalmers vs. Chalmers, suit for divorce; L. H. Putnam, of Blairmore for the plaintiff. This case will be heard in Calgary.

McDaniel vs. Penzance, for claim of \$6100 damage done by allowing weeds to scatter on land. J. W. McDonald, K. C., for plaintiff; J. H. Haslam for defendant. This case will be proceeded with after the jury case.

Graham vs. Ellison. Suit for damages for malicious prosecution and wrongful and excessive distress. J. H. Hicks of Macleod and C. F. Jamieson of Lethbridge, for plaintiff, and J. W. McDonald, K. C., for defendant. Jury case to commence at 10 o'clock Tuesday morning.

Peter Denman vs. Rex. This was to quash a conviction against Denman, sentenced by Magistrate Stewart of Graman in a case under the Domestic Animals Act, in which Denman was the defendant and found guilty. After hearing J. L. Fawcett, who appeared for Denman, His Lordship quashed the conviction.

The most important case for this sitting is that of Graham vs. Ellison, for which the following jury has already been selected: H. Bellerby, R. E. McNab, J. Storey, Nick Taittinger, W. J. Pettitt and R. Leurwick. This is a case in which the plaintiff is suing for \$35,000 for malicious prosecution and excessive distress.

J. Hicks of Macleod and C. F. Jamieson of Lethbridge represent the plaintiff, while J. W. McDonald, K. C., of Macleod is appearing for the defendant.

To-day (Thursday) the submitting of evidence on both sides had been concluded and adjournment of the court was made till 8 o'clock p.m., when counsel will address the jury and Mr. Justice McCarthy give the case into their hands for the verdict.

Just received from the Government Elevator, Calgary a car of barley and car of oats suitable for seed. For sale at the Alberta Pacific Elevator. 11-12

OF INTEREST TO THE SCHOOL

Owing to the large number taking part in the Concert in aid of the School Commencement and Prizes, it is necessary to divide the programme, as nearly all the children are very young—some only three years old. May 23rd—"A Dream of Fairyland." May 24th—"Dwarf Scene from Snow White" and local talent with a matinee for children at 3. All the proceeds in aid of the School Commencement and Sports.

Think of a fellow getting \$15 per day as a member of a jazz band, when he might be following some useful occupation for less.

The lowest or any tender not necessarily accepted.

HARRY W. BRIGHT, Secretary M.D. of Bright.

CAPITAL GOSSIP AND PROVINCIAL NEWS

Amusement Tax Receipts.

There was an increase of about \$2,000 in the receipts of the motion picture branch of the government in 1922 over 1921, according to the annual report of Howard Douglas, in charge of that branch. For the first four months of 1923 a considerable increase in receipts over the same months of last year is noted. The receipts in 1922 in this branch totalled \$296,623.61. The receipts from the amusement tax alone amounted to \$183,933.61. The total number of admissions to theatres and entertainments, hockey matches, etc., during

the year in the province was 5,571,170, or an average daily of 17,564.

The censors of motion pictures condemned 41 features totalling 194 reels during the year. The classification under which these were condemned were as follows: Immoral, 13; lawlessness and murder, 8; gruesome, 1; vulgar, 8; suggestive, 8; travesty on religion, 3. There were also 419 eliminations made in other films. During the year there was only one appeal from the censor board, and its decision was sustained. There were 20 convictions during the year, with a total of \$403 in fines.

Big Health Convention

The annual convention of the Canadian Public Health Association, of which Dr. W. C. Laidlaw, Deputy Minister of Health for Alberta is president, will be held at the University, Edmonton, on June 12, 13 and 14 next. Delegates from various parts of the Province and of Canada will be in attendance. The association includes also the Canadian Tuberculosis Association, the Canadian Association for Combating Venereal Diseases, the Association of Mental Hygienists, and child welfare. The meetings of the convention will be open to the general public.

New Settlers.

Two hundred settlers from the Hebride Islands arrived the past week at Red Deer, in which district they will take up farming.

Investigate Co-operative Marketing. A thorough investigation of the question of co-operative marketing in all its phases will be undertaken by a sub-committee of the Alberta cabinet, including Hon. J. E. Brownlee, Attorney General; Hon. Geo. Hoadley, Minister of Agriculture and Hon. R. G. Reid, Minister of Health. A large amount of material has already been collected on the subject. It is proposed to study the results of the various co-operative systems at present in existence.

Survey Railway Branches

Government survey parties in charge of H. G. Dimsdale, are now in the field in the Grande Prairie district, preparing the way for the construction of the extension to the Grande Prairie line authorized by the Provincial Government. The parties will also survey the route of the extension from Berwyn north-west of Peace River.

Telephone Poles Sold

Over \$100,000 worth of the surplus supply of telephone poles which the government has had on hand for the past two or three years, has been sold by the Telephone Department. The department expects to dispose of about \$250,000 worth all told. Sufficient of this material will be reserved for construction purposes for the next three years.

Prominent Visitors Coming

Prominent visitors to Alberta during the next few months will include Charles Chaplin, the motion picture comedian, who is to attend the Calgary Stampede, Harold Lloyd the comedian who is coming next month, and a score or more of prominent writers from the United States who plan on attending the Calgary Stampede and visiting other points of interest in the province. These include Jack Lait of the Hearst publications, Chas. Peters, artist of "Life" and the "London Sketch," William Slavyn McNutt of Collier's, and Heywood Brown of the New York World. It is expected that these visitors will also be on hand for the opening of the Banff-Windermere highway on June 30.

Alberta Musical Festival

The annual provincial musical festival which has been a feature in Alberta for years, and which has been adopted in other provinces and States, will be held the coming week in Edmonton.

Potato Products Co

A company for the development of products of potatoes, has been incorporated in Edmonton at \$50,000. The purpose is to manufacture by-products.

Special Rate on Coal

Sir Henry Thornton, head of the Canadian National railways, has announced a special rate of \$9 a ton Alberta coal to Toronto, instead of the present rate of \$12.70, during the summer months. Operators in the province state that this is not sufficiently low enough to put Alberta coal on the Ontario market in competition with the American product. A rate of \$6.00 has been asked.

Alberta Exhibit in Britain

There will be an exhibit from Alberta, at the empire exhibition in London in 1924. It is announced by Hon. George Hoadley. No exhibiting will be done this year, but preparations will be made for the British exposition.

White Beans a Success.

White beans have been grown with much success on the irrigated lands at Vauxhall, Alberta, and a large acreage is being put in this crop this year in that district.

Adopts Alberta System.

The State of North Dakota has now adopted the system of government cream grading which was inaugurated for the first time on the continent in Alberta last year.

Must Notify Livestock Commissioner. Owners of livestock in the province who have been driving stock from point to point have been ignoring provisions of the Stock Inspection Act, which provides that an owner must notify the livestock commissioner or the nearest provincial policeman, of his intention to remove the stock. This notice must reach the official at

PRE-REVIEW IS GIVEN OF FILM AT THE GRAND

To Be Shown at The Empress Soon

Universal Hunting Big Game in Africa Is Shown to School Teachers

Extra from Calgary Herald May 4th. Before an invited audience of educationists and prominent men and women of the city the first showing of the famous H. A. Snow pictures of Hunting Big Game in Africa was given at the Grand theatre yesterday afternoon. Beyond a doubt these are the most notable films that ever have been shown here in as much as they are remarkable in photographic detail as well as in educational value. And too they possess thrills which will appeal to the most calloused "movie" fan and the subtleties are illuminative as well as at times amusing.

The announcement was made during the course of the screening that these pictures would be shown at the Grand commencing May 14, and it is safe to say that all of those who were privileged to witness the pre-view will be literal walking advertisements for its public showing ten days hence.

The youth of our city will find the pictures of immense moment to them, and the older people will also discover that much of the things learned before the age of such progressiveness has been vastly changed with the passing of time. Few people realize that the giraffe, one of the most aristocratic looking beasts cannot utter a sound because of the absence of vocal chords. Many of us hitherto knew nothing of the elephant kingdom at the foot of an African creater who have never been tamed and are so vicious that but few hunters will attempt to catch even a snapshot of them.

But there are so many things in the film that are so interesting and instructive that a brief review cannot hope to cover them all. There are scenes of beauty such as the bathing of millions of penguins and the spearing of whales in pursuit of prey which were harpooned, towed ashore and relieved of their valuable sperm oil. The charge of the elephants and other animals upon the camera man, who frequently had very narrow escapes, and the movement of the caravan across the Veldt, where oxen fell prey to the deadly tsetse fly forcing the hunters to dispatch couriers to the nearest city for motor vehicles to supplant the fast diminishing herd. And then the little Ford is seen doing yeoman duty for the huntmen—it even aided in dispatching several ferocious beasts after they had become exhausted from fear at the sight of such a traveling apparatus.

Some descriptive and highly interesting views of the diamond mines were included in the exhibition. A trip through Zululand also was enjoyable. In fact the entire picture, which was in some nine reels, was so graphic and engrossing that no doubt many in the audience were sorry that there was not more of it, although it would seem that every phase of wild beast life and the manners and customs of the natives had been fully exploited.

It was announced that the picture had just completed a remarkable run of eleven weeks in New York City and that all theatrical attendance records had been broken by it there.

The picture is travelling as a road show. Watch for dates.

ENGLISH ACTOR NORMA'S LEAD IN "BRANDED WOMAN"

Percy Marmont, the English actor, is Norma Talmadge's leading man in her latest First National picture, "The Branded Woman," which will be screened at the Empress Theatre, Friday and Saturday. Other members of the cast are well known lights of the cinema world, including Vincent Serrano, George Fawcett, Grace Studdiford, Gaston Glass, Jean Armour, Edna Murphy, H. J. Carvill, Charles Lane, Sidney Herbert, Edouard Durand and Henrietta Floyd. The production is founded on Oliver D. Bailey's famous stage play, "Branded," having been adapted to the screen by Anita Loos and Albert Parker. It was directed by Albert Parker and photographed by J. Roy Hunt. Hugo Ballin was

especially engaged to design some of the settings, which are considered among the most remarkable ever filmed.

POLA NEGRI IS MYSTERY WOMAN

A quality ever present in the personalities of all women of the stage that have created dramatic history in their day is the quality of mystery—an eerie appeal behind which the soul of the real woman is never revealed to the public. This quality of mystery is one of the characteristics attributed in great measure to the striking Polish actress, Pola Negri, who is star of a European photodrama "Passion," which Associated First National has secured for presentation in America. In her, the "eternal feminine" assumes a sphinx-like stature to beguile, allure and charm.

Playgoers who remember the furor when Nazimova sprang overnight into the glare of prominence under Henry Miller's management on Broadway after enduring a season of obscurity in an East Side Russian stock company, know how this personality and mystic appeal won her fame in a single night. Bernhardt's perennial appeal is no less an extraordinary manifestation of the "eternal feminine" expressing itself in characters as remote as Joan of Arc and Camille. Duse, Rachael, Guilbert and Modjeska, to name but a few stars of past and present greatness, confirm the belief that in a supremely great actress there must dwell the element of the enigmatical.—Los Angeles Examiner.

POLA NEGRI GREAT

(From Moving Picture World.)

It would seem that the unexpected can happen in screendom as well as in the other and older realms of the amusement world. Producers and exhibitors in this country are known to look coldly upon costume dramas, doubly so upon those of foreign make. In the face of this, the First National has imported a picture from Europe dealing with the life and times of Jeanne Marie Vaubernier, better known as the Countess Du Barry, the celebrated favorite of the notorious Louis XV.

One point should be made clear; it is as romance and not history that "Passion" triumphs. Its historical background has great interest of its own and should add materially to the drawing power of the picture, but it is the love story of Jeanne and Armand de Foix and the part the King of France played in the destiny of these two beings of humble birth that will win most of the photodrama's popularity. This—and the acting of Pola Negri as the woman best known as the Countess Du Barry.

It is impossible to speak in too great praise of this foreign artist's embodiment of Jeanne.

As an authentic pictorial record of the life of the Countess Du Barry whose romantic career is one of the best known in all history, "Passion" will take its place as a screen classic.—Edward Weitzell. This big special comes to the Empress next Monday and Tuesday, at ordinary prices. One show only.

"PASSION"

Next Monday and Tuesday the Empress Theatre will have an attraction extraordinary, an offering such as few motion picture theatres ever offer. It is "Passion," the First National screen super-drama, with the brilliant Continental star, Pola Negri, in the stela role. "Passion" unfolds a thrilling story of the rise of a humble, little French milliner, to a position where she is able to dominate a king. She is a character replete with a strange mixture of virtues and faults, but she possesses irresistible will and smiles, such as easily ensnare men of the highest rank. But her great triumphs prove to be her great undoing in the end and the sequence of events through which she passes in her rise and fall combine to make one of the most appealing and most sensationally engrossing narratives the screen has yet visualized. It is a foregone conclusion that an unusual treat is in store for every patron of this theatre in witnessing this great super-drama.

a date prior to the removal of the stock, and must also set out the number of and brands on the animals, or in case of no brand, the sex, age and color of the animal. A copy of this notice must be in the hands of the man who is to drive the stock.

Telephone Statistics.

There are nearly 40,000 miles of long distance circuit mileage in the province of Alberta, according to the annual report of the Telephone Department of the government, now in print. There are 968 places in the province having government phone connection, and there are 217 places outside the province with which the Alberta system connects. Of these, 788 are in the States, 33 in British Columbia, and 106 in Saskatchewan. There is a total of 26,334 exchange subscribers' lines, and 20,617 rural subscribers' lines in the province.

Women's Institute Convention.

The eighth annual convention of the Alberta Women's Institutes will open Tuesday morning, May 29th, in Convocation Hall of the University of Alberta, Edmonton.

The morning of the first day will be taken up with the reports of the secretary, Mrs. A. H. Rogers, Fort Saskatchewan; the president, Mrs. J. N. Beaubier, Champion; the Immigration Committee, and Legislation Committee, while the session will conclude with an address by Hon. Irene Parley, M.L.A. The program of the afternoon will include reports of the two northern district directors, Mrs. W. Stewart, of Peace River, and Mrs. C. A. Gates, of Stony Plain, of the Child Welfare and Public Health Committee by Mrs. D. R. McIvor, Conventor, Gibbons, and an address by Mr. Earle D. McPhee, of the University of Alberta, on the Intelligence of School Children.

There will be also an evening session Tuesday, this morning inland revenue officers and city police brought crocks of whisky, buckets of gin and barrels of mash, as well as the complicated machinery of the biggest illicit still ever seized in Alberta, from the basement of a big house in South Mount Royal, where George Packwood, sr., and his son are alleged to have carried on moonshine operations. The house, standing at 2917 Eighth street west, is isolated. Perched on the top of the hill, it overlooks the Mount Royal Golf Club and Elbow Park. It is a few blocks south of Prospect avenue and the big residential district on the hill.

100-gallon Capacity

With a capacity of from 75 to 100 gallons of liquor per day, the plant is declared by revenue officers to be by far the biggest ever grabbed in this province. The officers were almost dumfounded at the complete layout they discovered when they entered the premises suddenly on Friday night. Packwood and his son were in the midst of operations and a great quantity of liquor was on hand. The plant takes up most of the room in the basement of the big house.

At the present price of alcohol and liquor, the value of the plant and the manufactured liquor runs into thousands.

The Packwood family lived in the house, there being three or four other children, in addition to the eldest boy, who is alleged to have helped his father run the place.

George Walter Packard, 56 years of age, and his son, George Aden Packwood, 27 years of age, who were arrested by inland revenue officers and city police on Friday night, were two stills and a large quantity of liquor were found, faced charges under the Inland Revenue Act and the Alberta Liquor Act, in the police court on Saturday morning.

The accused were not represented by counsel and the case was remanded until Tuesday morning. The elder Packwood refused to enter a plea until he had consulted a lawyer. His son offered to plead guilty to the Inland Revenue Act charges and not guilty to the Liquor Act charge. "I'd like to get it over to-day," he said.

There will be an innovation in the Convention procedure this year, the various district directors taking their turn with the president in presiding at the sessions.

Girls' Club Convention.

The Convention of the Women's Institutes' Girls' Clubs will precede the W. I. Convention, opening on Friday morning at Convocation Hall, University of Alberta, Edmonton, May 25th. The first session of the convention will include report of Secretary, Mrs. Clara Johnson, Alliance; address of welcome, Dean Howen, University of Alberta, Miss Winnie Carter, of Botha, replying; address of President, Miss Minnie Page, Elmore, with reports of various branches. Miss Abbie De Lury, of Saskatchewan, Sask., director of Home Makers' Clubs, will give the address at the afternoon session. They have, in addition been invited to visit the Woodland Dairy. Other items on the program include music by the Huxley Girls' Club and more reports of branches. Friday evening will be "party night."

Mrs. Margaret Lewis, Factory Inspector, will give an address on working for a living, while Mrs. Gates will conduct a question period on Saturday morning; these together with branch reports and assembly singing complete the program of this session. The time of the afternoon session will be devoted to election of officers, resolutions, and unfinished business, while Mr. E. A. Corbett, University of Alberta, will give an address on Quebec of To-Day.

Just received from the Government Elevator, Calgary a car of barley and car of oats suitable for seed. For sale at the Alberta Pacific Elevator. 11-12

The dictionary is a comforting sort of book. One can always find how to spell a word if one knows how to spell it in the first place, so that one can find it in the dictionary.

MOONSHINE MAKERS ARE DISTURBED

REAL SQUIRREL WHISKY.

At last the police have discovered where the kick in "squirrel" liquor comes from. A pot of mash found during the seizure of an up-to-date still here last night, contained among other articles too numerous to mention, two gophers and a couple of mice. The seizure was made by Constable Jones of the A.P.F., assisted by Chief of Police Ridley, of this town. There was no one at the plant at the time.

The still was found in an abandoned shack three miles south of town. The outfit was complete and capable of turning out about twenty gallons of "licker" a day. Fifteen gallons of the finished product were found bottled handily for your favorite bootlegger. Five barrels of moonshine mash on the regulation raisin and wheat variety, were unearthed, smelling to high heaven, the rankst samples yet brought to light by the police, it is said. The police have no clues, but are investigating.—Lethbridge Herald.

Calgary, May 19.—For more than an hour, this morning inland revenue officers and city police brought crocks of whisky, buckets of gin and barrels of mash, as well as the complicated machinery of the biggest illicit still ever seized in Alberta, from the basement of a big house in South Mount Royal, where George Packwood, sr., and his son are alleged to have carried on moonshine operations. The house, standing at 2917 Eighth street west, is isolated. Perched on the top of the hill, it overlooks the Mount Royal Golf Club and Elbow Park. It is a few blocks south of Prospect avenue and the big residential district on the hill.

With a capacity of from 75 to 100 gallons of liquor per day, the plant is declared by revenue officers to be by far the biggest ever grabbed in this province. The officers were almost dumfounded at the complete layout they discovered when they entered the premises suddenly on Friday night. Packwood and his son were in the midst of operations and a great quantity of liquor was on hand. The plant takes up most of the room in the basement of the big house.

At the present price of alcohol and liquor, the value of the plant and the manufactured liquor runs into thousands.

The Packwood family lived in the house, there being three or four other children, in addition to the eldest boy, who is alleged to have helped his father run the place.

They're different;
Those New Scottish Cheviots and Seonies

There's something different about goods made by the good makers in Scotland; something exceedingly rich in design, warm in coloring, attractive in the weave. They're different, and have an unusual air of character and distinction.

Every Scottish fabric in the Dracwell line is guaranteed pure virgin wool, perhaps that is one of the reasons for their charm. They vary in price from

\$35.00 to \$40.00 and \$50.00, but they are all full valued.

THURSDAY, MAY 17th, 1923

MACLEOD'S TOWN COUNCIL

Introducing Mayor J. W. McDonald, Councillor A. T. Leather and Councillor C. W. Stevens:

The acclamation accorded the nomination of the foregoing new head and members of Macleod Town Council speaks for the esteem in which they are held and the confidence Macleod ratepayers have in their ability to conduct town affairs.

The council is now again at full strength and the Macleod taxpayers are confidently looking forward to a thorough and efficient administration of the town's business.

DESTRUCTION OF TIMBER

In the Canadian Forestry Magazine, Mr. John R. Booth, the Ottawa lumberman, gives emphatic warning respecting the waste of our timber assets. Mr. Booth, who is 96, has spent a lifetime in the timber business, and he knows from experience the disastrous results of the rapid depletion of our timber resources. The carelessness of mining prospectors in particular he denounces as one of the prime causes of fires that devastate far more good timber than cutters would take in ten years. He says:

"Take for example our Montreal River limit, 1,700 square miles that we bought a few years ago for \$300,000 in open competition. That, of course, is not the final payment, for we have ground rent, fire taxes and cutting dues. The country was absolutely green at the time we bought. Spruce stood as thick almost as cornstalks—a beautiful country, as fine as I ever saw. I could not find traces of a single fire over the whole extent. Well, we had it open only a short time when it was opened to prospectors, opened, mind you, without evidence of a solitary mineral showing on any part of it, no preliminary survey by geologists. To this day not a mine or a real prospect has been uncovered on that 1,700 square miles, but a horde of irresponsible men seeking non-existent mines have destroyed from one-half to one-third of that country. They have ruined as much timber as would have kept our Ottawa mills running for 25 years, and the end of their devastation is not yet. The lumberman made the roads, the lumberman paid for the timber, but the Government opened wide the doors to the prospectors, whose first incentive is to spread fire and clear off the surface of the rocks.

Mr. Booth declares that for every dollar's worth of mineral taken from the ground, a hundred dollars' worth of good timber has been destroyed. The country is forced to the edge of a timber shortage by fire, not by commercial utilization. That this is true is confirmed by all who know the remaining timber resources of Ontario and Quebec. We have no "inexhaustible" reserves. In about the same period that will see the Masaba iron ore range in Minnesota exhausted, the anthracite mines of Pennsylvania almost done, the oil resources of the United States much depleted, our timber resources are not unlikely to be in the same deplorable condition as the United States timber reserves. The only remedy is a stringent policy of protection against fire, of severe oversight of men who go into the woods, and a thoroughgoing policy of reforestation. Most of our Northern areas are good only for mineral development or lumber growth. We have great agricultural areas outside of

Make them every morning

Shoe Polishes

that section—areas which will suffice for half a century. We should have a public policy directed with far more vigor toward the preservation and proper development of these valuable Northern assets.

N. B. FOREST FIRES REDUCED

The effect of offering cash prizes to the rangers of New Brunswick who kept their districts free from timber fires last year was to greatly reduce the provincial losses.

Two hoboes met on a blind siding. One had been a salesman whose hours were 10 a. m. to 4 p. m. The other one didn't have any money either.—Manchester Herald.

CHARLES CHAPLIN

By Anna Hamilton Wood.

I stodd on the corner a-watchin' our boys,
In their khaki clothes march by—
With shoulders squared, with firm jaws set,
And brave young heads held high.

And it set me a-thinkin' of '63,
Oh! war is a hartin' thing!
It takes of the best and gives of the worst,
When the final toll comes in.

When the first lad passed, my eyes fell on
A movie house over the way,
Where the picture of Charlie Chaplin showed
As the feature piece of the day.

And the sun's rays hit on his foolish cane,
Till it seemed like a glistening sword,
And the funny round hat that he wore
Was a helmet strong and broad.

Then all of a sudden I saw the man,
As God and the angels see,
As big and as brave a soldier lad
As the troopers can ever be—
For with heart in the trenches he falls about,
And romps in his own queer way,
And men who suffer may see the films,
And forget for the space of a day.

The lesson of laughter is to give,
Yet his keen young face looks sad
But he's done his bit in the great world war,
And I say, "God bless the lad!"

In Barnum's time there was a sucker born every minute, and from the number of used cars sold every day we would say there's been no race suicide.—The Vivifier.

Little footsteps, how I love them,
Gliding 'round the cottage door;
In and out, I hear them trample,
Up and down the kitchen floor.

Little ones in tenderest keeping,
Every day we love them more;
It is not real home without them,
Little footsteps 'round the door.

Little footsteps, I can see them
Dancing in their childlike play;
In their glee, now all forgetful
Of the hours that pass away.

And when absent I am longing
For those little ones once more;
I'm near heaven when I hear them,
Little footsteps 'round the door.

Little footsteps, soft and gently,
Gliding 'round the cottage door;
How I love to hear them trample
Up and down the kitchen floor.

Off! in mischief they are straying,
Seems we only love them more;
And we kiss them! How we'd miss them,
Little footsteps 'round the door.

A DREAM OF FAIRYLAND

The Story

Many years ago two little orphans set out to find fairyland. They wandered so far that they were lost, and too tired to go further, they lay down under a tree and fell asleep. They dreamed that little forest children invited them to Fairyland and lovely fairies came and played and danced and formed a magic circle. When the circle broke they themselves had turned to fairies, and for a long time they were very happy. Bad fairies came and coaxed them away from the good ones, and told them they could do always as they pleased, if they went to the bad fairies' fairyland. The orphans stayed with the good fairies, and the bad ones called all the flowers, the birds, the butterflies and the bees to try to get them to come from the good ones. The orphans are greatly attracted and despite the warnings of angels, follow the bad fairies. No sooner have they left the good fairies than they are desert by the bad ones and they are lost in fairyland. After a great deal of trouble the good fairies find them and the Christmas Fairies and sprites come to them. The bad fairies repent and come to cook for them. They coax the good fairies to let them return and soon they are all united again. The bad fairies are good fairies and fairyland is all happiness as the orphans awake from their dream.

OBITUARY

LORNE WALKER BURIED AT CALGARY

The funeral of Comrade F. L. Walker, C. E. F., of Macleod, was held in Calgary on Thursday afternoon at 3 p. m. A largely attended funeral service was first held at the chapel adjoining Graham and Brennen's undertaking parlors, after which the solemn cortege proceeded to the cemetery where short burial services were conducted by the Rev. Craig of the North Hill Methodist church, and by members of the G. W. V. A.

The deceased soldier was 27 years of age and while in England contracted influenza in 1917 and from which dread disease he never recovered, eventually causing his death at the Keith sanitarium in Calgary on Wednesday morning last.

Six of the late soldier's comrades from the sanitarium acted as pallbearers and a large number of sorrowing friends and acquaintances also a number of returned veterans were in attendance at the funeral.

There were some beautiful floral tributes amongst which was a large wreath of poppies from the Calgary G.W.V. A. and another magnificent wreath from comrades of the Keith sanitarium.

The late Private Lorne Walker was born at Boissevain, Man., coming to Macleod in 1912 where he resided until leaving for overseas. He was a prozimer.

He is survived by one sister, Mrs. J. T. Marks of Macleod and a brother Wesley Walker of Shelby, Mont.

For many years prior to his enlistment for active service, and also on his return to Macleod, the deceased was employed by J. T. Lambert, builder and contractor of Macleod.

DEATH OF GEORGE BRAYBROOK

Another Macleod old timer was buried on Thursday of last week, in the person of George Braybrook aged 63 years. The deceased came to Prince, Alberta, from England, over 30 years ago, shortly after coming to reside in the Macleod district, where he has lived ever since. A few months ago he became an inmate of the Macleod Hospital through general debility and died on Wednesday of last week. The funeral service was held at the Methodist church and was conducted by the Rev. G. D. Armstrong, after which the remains were taken to the Union cemetery where interment was made. A large number of residents of Macleod attended the services, as also did a number of old timers from around Macleod and district.

The late George Braybrook was hardly known by his proper name, but there is hardly an old timer in the district who would not instantly remember "Jumbo" and will learn with regret the news of his death. After farming for several years he took up the business of plastering which he found far more profitable, and practically half the farm houses in this district can show the craftsmanship of Jumbo's hands.

He is survived by one sister, Mrs. Marlow, sr., who resides at Rathwell, a few miles south-west of Macleod.

DEATH OF WILLIAM TAYLOR

William Taylor, farmer, living six miles south of Macleod, died Saturday evening at his home. He had been under the care of his medical advisor for the past three years, more or less, and his death was not unexpected.

Mr. Taylor came from Ontario, Bruce County, thirty-five years ago, and with his brother they located on Willow Creek, and three years later sold out and bought land eight miles north of Macleod, and three years ago he bought a fine home south of Macleod, where he has since resided. He owned several farms, with stock and implements. He was a booster for Alberta and the West. He was a bachelor. The funeral was held on Monday last and was largely attended.

DEATH OF BABY GERALDINE DICKSON

Baby Ethel Geraldine Dickson died on Tuesday morning last at one o'clock, after a lingering illness of about seven weeks. The little one was the beloved daughter of Mr. and Mrs. T. G. Dickson and was only two years and four months old. The baby first contracted whooping cough and later the flu, which developed into bronchial pneumonia, and from which she died despite best medical attention.

The child's funeral took place on Wednesday, May 16th, at 10.30, from the family residence on 23rd street. The funeral services were conducted by Rev. Father Hughes of Granum, after which many sympathizing friends of the bereaved parents formed a sorrowful funeral procession to the Roman Catholic cemetery where interment took place.

CARD OF THANKS

Mr. and Mrs. T. G. Dickson wish to express their appreciation for the kindly help and sympathy of many friends during the illness of, and on the occasion of the death of their little daughter, Ethel Geraldine Dickson.

THE KING'S MESSAGE

As a striking instance of modern progress and world-wide organization, the manner in which King George and Queen Mary are delivering their Empire Day message to the children of Great Britain and the overseas Dominions is noteworthy.

Their Majesties had a strong desire to speak in person, if such a thing were possible, to every school child in the Empire on May 23rd, but this being physically impossible, it occurred to them, presumably as they listened to the Victrola, which is in the Royal Music Room, that they could have their voices heard by every school child by having a record made which could be sent everywhere.

To accomplish this, it was necessary to employ an organization with world-wide connections; hence, they chose the "His Master's Voice" manufacturers, who, through their connections throughout the British possessions, can give a world-wide distribution in each country, through their dealer organization, to every city, town and village in their respective countries.

The message which the record conveys is not to be played to anyone before it is heard by the children on May 23rd, after which it may

MACLEOD - ALBERTA

OIL STOCK SWINDLERS HAVE COLLECTED \$100,000,000

In a few days the United States Government will begin the trial of the ninety-two Texas oil promoters who are under indictment. Among them is Dr. Frederick A. Cook, who claim to have discovered the North Pole. He did not discover the Pole but he rediscovered the truth that the world is full of credulous people, a fact which he has taken advantage of. Another indicted person is Robert A. Lee, one of the janitors of the Idaho State Capitol, who was paid \$12.50 a week for the use of his name, the effort being to connect him with the famous Lee military family, and inspire confidence. A third indicted person is J. W. (Heg Creek) Carruth, who, in his advertising matter, described himself as an expert geologist, oil expert and discoverer of the big Desdemona field. The fact is that he is a small town barber, and when the Desdemona field was discovered he was busy shaving the back of somebody's neck, and probably shaving it in a curve. All he knows about oil is that it is used for shampoos. Nevertheless, having a profound faith in the folly of the human race he is alleged, through lurid advertising, to have separated the unwary from several hundred thousand dollars.

Two Million Victims.

It has been estimated by the Government that in the past five years or so the Texas oil promoters have taken about \$100,000,000 from some 2,000,000 shareholders, who have received practically nothing in return.

No reference is made, however, to the owners of wells in operation. In fact if there were not any great wells in Texas it would have been impossible to sell stock in worthless concerns. It is the known value of gold that makes the gold brick possible. The fraudulent operators form companies, secure options on certain Texas lands, suppose to be in the heart of the oil district, and then put on a high-powered advertising campaign. They operate weekly and even daily "newspapers," which are merely weekly and daily advertising circulars containing information or misinformation concerning the Texas oil fields. These they send throughout the country. If a man makes one investment in oil stock his name is immediately passed on to some 500 other stock selling concerns and he will receive what is called their advertising "literature" perhaps for the remainder of his life. Like other swindlers, these oil men calculate that the man who can be swindled is the man who has been swindled. Once bitten, twice shy is not an aphorism that applies to the really gullible.

The Literature.
It is said that the indicted men are not worrying over the prospect of going to jail. They are only annoyed that the publicity given to them will cause the supply of investors to dwindle for the time being. As a rule they have been clever in preparing their advertising matter, and ads that seem to the unwary to be definite pledges of huge dividends, prove, on

careful scrutiny, to be merely assertions concerning the hopes of the promoters. They may hope, or confidently believe that they will make millions for their investors, but it is not a criminal offence to hope or believe. The offence lies in a false promise or misrepresentation. Here is a typical advertisement:

"We've got a 2,000 acre block directly south of the great El Dorado oil field on the famous Middlefork structure, surrounded on three sides by the great oil fields of El Dorado, Smackover, Homer and Haynesville, and on the east by the Monroe Gas Field—the biggest in the world. You take half the property and half the profits. A 20,000 barrel well on this 2,000 acre block will make the property worth from \$10,000.00 to \$25,000,000. And would make an investment of just \$25 worth to you \$5,000 to \$15,000, about 300 for 1. A hundred spot would give you a tidy stake for life. Slip your check in the mail to-day and watch our smoke. We are out to win quick and win big. Bet your stack, men, and bet 'em quick. There's a fortune at stake for us all." Facts Suppressed.

They do not say how far distant are the paying wells, which surround the property. They may be many miles away. Nor do they promise that there will be a 20,000 barrel well found. They merely say that if one were found it would be worth many millions, which is undoubtedly true. Another advertisement says that a company has struck a well that is flowing 10,000 barrels. It does not say how long it requires for the 10,000 barrels to flow. The inference is, of course, that this is a daily flow. It might, however, be a yearly flow or a matter of a century. It is a well known fact that a gusher that flows 10,000 barrels to-day may become a dribbling 50 well affair to-morrow. On the strength of a 10,000 barrel flow, even if it lasted for a day, the company might well collect half a million dollars. The largest well ever discovered in the Smackover field flowed 50,000 barrels the first day and in a week was flowing 50 barrels, yet the fact of the 50,000 barrel flow has been used to collect perhaps a million dollars from unwary investors in fields said to be in the neighborhood

of this gusher.

Cook, the Merger.

The methods of Cook and his associates were much like those of the others, but they specialised in merging companies. It is said that the famous explorer was instrumental in the merging of some 200 companies. As fast as one company was formed and had received money for stock it was merged in another, the original subscribers being informed that they had to advance another 25 per cent. for which they would be given stock

variably they succumbed, with some sort of vague idea that they were protecting an investment, whereas they were merely throwing good money after bad. The oil buccaniers made good use of the telephone. If a man who wrote for a prospectus did not reply with a check, he received a wire informing him that the subscription lists were about to close, and that there was not a moment to be lost. It is said that one oil company in New York paid \$16,000 wire tolls for one day's messages, and got in return more than \$100,000. Some of the few of these wildcat schemes that paid an investment on two are alleged to have paid out of capital, in order to secure further investments.

EXTRAORDINARY POWER POS-
SESSED BY ADRENALIN

A cheap, colorless solution that has had its place on the physician's shelf for some years suddenly has been put to miraculous uses, making the heart beat when the pulse of life had seemed to flicker out. With the restoration of several newborn babies whose lives seemed ended almost before they began, the possibilities of adrenalin are only beginning to be gauged. It is likely to be called into use extensively from now on. But it is not a remedy for the unskilled to handle. Adrenalin is the most powerful astringent known and its use must be prompt and sure. It can be bought by any one in the drug store for as little as \$1 an ounce, but the physicians who have used it effectively feel that the unskilled should let it alone. The lightning judgment on when and how to use it. So little is known about its possibilities that there is ample room for experimentation.

A case was reported last week when three injections were required to restore life in the dead baby born to Mrs. James Miller, of Belmar, N.J. Each time the heart beat for a few minutes and then gave out. The third injection was a strong one of 160 milligrams, and this time the infant heart took up its work and the baby was now quite normal. The preceding case was that of the Shrewing baby brought to life in the Brownsville and East New York Hospital, Brooklyn, with the prompt application of adrenalin by Dr. J. A. Taperson, says the New York Tribune.

A few weeks earlier Dr. Philip Mininberg, of the Park Maternity Hospital, Brooklyn, reported the first success of this kind recorded, when he succeeded in bringing one of the Isaacson twins to life. In Detroit a baby was restored for six hours by the same means, but in this instance the thread of life seemed too frail to endure and the baby died. All the physicians involved are of the opinion that before long adrenalin will be widely used for this purpose. It was a bold move to apply it in the first place, but the whole operation has to be quick and fearless. Adrenalin is technically described as "an astringent principle of the suprarenal gland used as a hemostatic and a heart and vasomotor stimulant." The extract is usually taken from the adrenal or suprarenal gland of the sheep, most potent of the ductless glands.

The astringent action of the solution makes the muscle cells contract rapidly. They remain in this condition for several minutes while the tiny capillaries are squeezed and any blood that may be in them is driven out. The contraction prevents any more from entering. The absence of blood permits the surgeon to see exactly what he is doing as he performs the operation. Adrenalin has another potent quality, discovered by Dr. Charles E. de M. Sajous, of Philadelphia. The most

important substance in the blood corpuscles is known as hemoglobin, which changes from blue to red as the corpuscles are laden alternately with carbon dioxide or with oxygen. Laden with oxygen, the hemoglobin is called oxy-hemoglobin. Adrenalin supplies the substance which enables hemoglobin to be converted into oxy-hemoglobin in the lungs. It is life-giving in this respect. The Isaacson twins were born before their time. They were very tiny, but the girl breathed without assistance. After a gasp or two respiration stopped in the little boy. His heart apparently ceased to beat. In the ordinary course of events he would be pronounced dead. But Dr. Mininberg took his hypodermic syringe, put a few milligrams of fluid in the needle, stabbed the point through the infant's chest wall and between two ribs, then straight into the heart itself, where he injected the fluid into the surrounding muscles. It was a bold stroke, but it worked.

It penetrated the coronary artery, contracting the muscular cells until the artery was squeezed and forced to send the blood, together with the adrenalin, circulating through the heart. Coming into contact with the fibres of the heart, the adrenalin made them all contract. The minute quantity of the precious extract that flowed to the lungs was sufficient to give the hemoglobin in the red corpuscles power to absorb oxygen. The oxygen already in the lungs turned the substance into oxy-hemoglobin and thus the entire body was furnished with all the oxygen it needed.

Dr. Mininberg had the baby briskly massaged after this so as to prevent the contraction from becoming permanent. With the pulmotor and a tank of oxygen, he kept the lungs contracting and expanding while he supplied them with more oxygen than they normally drew in from the air. The baby's blood pressure rose so high that while the pulmotor was still being operated half an ounce of blood was drawn from his veins and the pressure on his heart was relieved. In an hour's time the child's heart was beating normally and its respiration was completely restored. One of the chief risks in using adrenalin is that the blood pressure will be raised too high.

Highland Apiary—Choice, well ripened, Clover Honey

Six 10lb. or 12. 5lb. pails. \$9.50
Backwash Honey \$4.00 for six 10lb. pails.

The Follies
GOD SAVE THE KING
Accompanist Mrs. Ker Seymour
Orchestra

Violins — Mr. Doney, S. Brooks, A.
Hart

Piano—Lillian Andrews

Important substance in the blood corpuscles is known as hemoglobin, which changes from blue to red as the corpuscles are laden alternately with carbon dioxide or with oxygen. Laden with oxygen, the hemoglobin is called oxy-hemoglobin. Adrenalin supplies the substance which enables hemoglobin to be converted into oxy-hemoglobin in the lungs. It is life-giving in this respect. The Isaacson twins were born before their time. They were very tiny, but the girl breathed without assistance. After a gasp or two respiration stopped in the little boy. His heart apparently ceased to beat. In the ordinary course of events he would be pronounced dead. But Dr. Mininberg took his hypodermic syringe, put a few milligrams of fluid in the needle, stabbed the point through the infant's chest wall and between two ribs, then straight into the heart itself, where he injected the fluid into the surrounding muscles. It was a bold stroke, but it worked.

It penetrated the coronary artery, contracting the muscular cells until the artery was squeezed and forced to send the blood, together with the adrenalin, circulating through the heart. Coming into contact with the fibres of the heart, the adrenalin made them all contract. The minute quantity of the precious extract that flowed to the lungs was sufficient to give the hemoglobin in the red corpuscles power to absorb oxygen. The oxygen already in the lungs turned the substance into oxy-hemoglobin and thus the entire body was furnished with all the oxygen it needed.

Dr. Mininberg had the baby briskly massaged after this so as to prevent the contraction from becoming permanent. With the pulmotor and a tank of oxygen, he kept the lungs contracting and expanding while he supplied them with more oxygen than they normally drew in from the air. The baby's blood pressure rose so high that while the pulmotor was still being operated half an ounce of blood was drawn from his veins and the pressure on his heart was relieved. In an hour's time the child's heart was beating normally and its respiration was completely restored. One of the chief risks in using adrenalin is that the blood pressure will be raised too high.

LOCAL AND PERSONAL NEWS

Miss A. M. Wilson was a visitor to
Lethbridge on Tuesday of this week
on business.

A. D. Ferguson motored to Pincher
Creek Tuesday, returning to Macleod
the same evening.

Mrs. W. Gray, of Lethbridge, is the
guest of Mr. and Mrs. C. W. E. Gar-
diner, this week.

Mr. and Mrs. A. Stephenson, of
Granum, were visitors in Macleod on
Wednesday of this week.

Fire Chief Hardy and Mrs. Hardy,
of Lethbridge, were in Macleod over
the week-end visiting friends.

Mr. and Mrs. A. T. Leather motored
to Nobleford on Wednesday afternoon
on business, returning home the same
evening.

Mrs. W. Hancock and daughter, of
Peace River, are in town for a couple
of weeks and will be the guests of
Mrs. A. Ferguson, Twentieth street.

The Rebekahs are holding a social
evening on Tuesday, May 22nd, in the
I.O.O.F. Hall at which Oddfellows,
their wives and sweethearts are in-
vited to be present.

Dick Armour, who has been spending
his holidays at his home in Macleod,
returned to Vulcan on Tuesday night,
where he is a member of the Bank of
Commerce staff.

Mrs. R. J. E. Gardiner left Monday
morning for Edmonton, to be present
at the Convocation of the University
of Alberta on Wednesday, May 16th,
where Miss Bessie Gardiner will re-
ceive her Master's Degree. Mrs.
Gardiner expects to be absent about
two weeks.

The marriage of Donald Douglas,
of Granum, to Miss Nellie Scott, of
London, Ont., took place at the home
of the bride's uncle, at New Dayton,
Alta., where Miss Scott has recently
been engaged in teaching. Mr. and
Mrs. Douglas will reside at the for-
mer's ranch about six miles east of
Granum.

Mrs. E. H. Oliver and baby Vern
arrived in Macleod on Tuesday night
of this week from Calgary. Mr. and
Mrs. Oliver and family will reside in
the house on 19th street formerly oc-
cupied by R. W. Russell.

The Degree for Master of Arts was
conferred upon Miss Bessie Gardiner
of the Alberta University on Wednes-
day at the Convocation held at the
university auditorium. Miss Gardiner
is the first Macleod student who re-
ceived her education in the Macleod
public and high schools to have this
honor conferred upon her. After
graduating from Macleod high school
Miss Gardiner entered Alberta Uni-
versity and took her B. A. degree in
1921. She is the daughter of Mr. and
Mrs. R. J. E. Gardiner of Macleod.

A C. P. R. steam shovel is at work
in the gravel pit west of the town.
The material taken out is being dis-
tributed over the western end of this
division and makes ideal ballast for
the road-bed, being fine gravel and
carrying a small percentage of sand.
The railroad company have every rea-
son to be proud of the condition of
their lines in this part of the country
and the added material will put their
road-bed in even better shape. Up
to the present time nearly two thou-
sand car loads of gravel have been
taken from the pit in the two weeks
the shovel has been at work.

A big business deal was consum-
mated in Macleod when the Stacey Lum-
ber company turned over their Macleod
branch lock, stock and barrel to the
McLaren lumber company on Friday
last. This will mean that the
McLaren company will operate the
only lumber yard in Macleod, as they
have taken over the stock of lumber,
shingles, etc., office, warehouses
sheds, yards and drays formerly owned
and operated by the Stacey com-
pany. The late manager of the
Stacey Lumber company in Macleod,
F. Timleck, who has been a resident
here for the past 15 years is leaving
in a few days for his home in Ontario.
The McLaren company's enlarged
business will still be continued under
the management of J. B. Sutherland,
who has been manager of this concern

for a number of years.—Lethbridge
Herald.

H. Bellerby, of the St. Paul's Mis-
sion is one of the jurymen in the case
of Graham vs Ellison and has been
spending the week in town.

Orville Kirk had the misfortune to
break his left arm last Wednesday
night while playing baseball. It will
be remembered that he broke the
same arm last summer when he fell
over a fence which he was in the act
of climbing.

The many friends of Miss Margaret
Watson, now of Strathmore, will be
pleased to learn that she is able to be
about again after having been con-
fined to the house for the past six
weeks with a severely sprained ankle.

At a meeting of those interested in
the formation of a brass band, and
which was held in the 93rd Battery
hall last Tuesday evening, the main
business transacted was the receiving
of reports from committees appointed
at a previous meeting. There was
a good turnout, some eighteen being
present. Mr. J. E. Edgar was elected
bandmaster. The question of provid-
ing instruments was discussed and it
was decided to approach the town
council requesting the use of the
brass instruments known to be in
their keeping. A committee consist-
ing of Messrs. Edgar and Bremner
will inquire into the condition of the
instruments. The next meeting will
be held on the 22nd inst., at same hour
and place.

MACLEOD DISTRICT METHODIST CHURCH ANNUAL MEETING

The Annual District Meeting of
the Methodist Church, for the Macleod
District, was held in the Claresholm
Methodist Church on Wednesday,
May 16th and 17th. On the roll
call every minister answered to his
name with a good representation of
lay delegates.

The morning services were opened
by the Chairman, Rev. A. A. Lytle, of
Nanton, which was followed by the
ministerial session until adjournment
at noon. In the afternoon a general
session was held, when the lay dele-
gates were allowed to report, and
each church was registered without
deficits, with one exception, which was
only \$100. Altogether the District is
in better shape financially than pre-
viously. The other departments of
the Church were also in a healthy
condition, every field is manned, and
practically no changes will be made
this year.

The prohibition campaign will be
carried on vigorously during the com-
ing referendum.

At the election of lay delegates to
the Alberta Conference which opens
on May 29th, the following lay dele-
gates were elected: Macleod Church
A. F. Grady, F. Crowson, Mrs. Faw-
cett, alternate. Claresholm, J. Mc-
Kinney, Parkland, C. E. Spencer
Mrs. Jones, alternate. Nanton, C. J.
Stein, Mrs. White, Cayley, C. H.
Howard, Mrs. Howard, alternate.
High River, J. Mack, Mrs. Mack, al-
ternate. Bellevue, Geo. Shevelo.
Hillcrest, F. J. Smith, Mrs. Pinder, al-
ternate. Wednesday evening a ban-
quet was given by the Ladies' Aid of
the Claresholm Methodist Church, in
the Church Hall.

CROP PROSPECTS BRIGHT AT MACLEOD

Crop conditions in and around Macleod
were never better than they are
at the present time for this season of
the year. The deluge that arrived on
Sunday and Monday was thrice wel-
come and the farmers are now begin-
ning to wear the "Sunny Jim" smile.
The heavy rainfall was general and
north, south, east and west were
equally benefited, although the rain-
fall in the Standoff and Blood Reserve
districts was of longer duration and
heavier. The weather on Tuesday
was fine although it still remained
cool and threatening. The trails
south and west are impassable for au-
tomobiles, but as one exultant tiller of
the soil exclaimed, "We don't care if
autos can never travel so long as the
rain stays with us."

Wednesday night's downpour has
added a further degree of optimism
among agriculturists of this district
and old timers say all signs point to-
ward a banner year for the south, and
especially for Macleod district in 1923.

ors.

MISS A. M. WILSON

REACH & COMPANY, LTD.

DRY GOODS, BOOTS & SHOES, CLOTHING, ETC.
GROCERIES.

This week we have Flour, Bran and Shorts

Spring is here in earnest, bringing tribute in Salads and new Vege-
tables. Look at the variety to choose from, to renovate your blood.
Spinach, Celery, Cauliflowers, Asparagus, Green Onions, Lettuce
and Potatoes. Fresh Strawberries, the pioneers of the fruit world.
Bananas, the old reliables, Oranges, Apples, etc.

Dry Goods to the Front

Our old stock of House Dresses was cleaned out at ridiculous prices
to make room for the New Styles. Some of the styles are catch-
ing. The variety of colors are enticing. If a woman knew how
irresistible she looks in the house with a nice, wide, short sleeve,
rolling the pie paste, showing the dimple in her elbow, she would be
very particular in the choice of a Dress for the house. You please
your children and tempt your husband.

Children's and Misses' Dresses

In Serge and Checks. A few left over at Half-price. Less than our
actual cost.

Hats and Caps for the kiddies in straws, tweeds and wash goods.

Boots, Shoes and Slippers

We always have odd lines to clean out. Manufacturers are con-
stantly changing. It is almost impossible to sort up in sizes, so it
is up to us to order months ahead and guess the sizes likely to be
sold. Half the time we send an order only one or two pairs come,
balance to follow, is the reply. The customer can't wait, so that line
is incomplete, hence the reason for clearing these odd lines at cost.

Always look for Bargains in our windows. Something fresh every
week.

REACH & COMPANY, LTD.

ADVERTISING IN THE MACLEOD TIMES WILL PAY YOU

We offer no apology for having added to our Harness and Saddlery
lines a stock of

Men's and Boy's Staples in Boots and Shoes

Also a complete line of

Overalls, Smocks, Shirts, Gloves Mitts, Baggage, Etc.

The harness business has now developed into a seasonable business
for the Spring and Fall Season, and as we keep our doors open 12
months in the year, we have decided that we must carry such Staples
as above mentioned.

In theabovelines it is our aim to make Quality a pre-eminent, out-
standing feature. We have been in the leather business most of our
lives and who better could you trust your requirements to.
Our Footwear, Gloves, Mitts, Etc., will carry with it the usual Great
West Saddlery Co's Guarantee.

Soliciting your esteemed patronage.
